Boomerang	714	561
Channel O	1050	739
Cartoon Network	793	660
Supersport Live Events	1638	1164

Recommendations

Content Strategy

1. Double down on live sports — Sports content delivers 40% of all views. Prioritize acquiring more live event rights and promote sports packages during major tournaments to capitalize on event-driven viewership spikes.

2. Expand music programming — Channel O and Trace TV combined deliver 20% of views with broad demographic appeal. Consider adding more music channels or investing in localized music content.

3. Reassess underperforming channels — kykNET (45 views), MK (32 views), and Wimbledon (3 views) have minimal engagement. Evaluate whether to consolidate, repackage, or replace these slots.

Audience Development

4. Target female subscribers — At only 10% of the audience, there is a significant untapped market. Introduce female-oriented content (lifestyle, drama, reality TV) and run targeted acquisition campaigns.

5. Focus retention in Gauteng & Western Cape — These provinces hold 46% of users. Use localized promotions and community partnerships to deepen engagement in these strongholds.

6. Invest in Limpopo & Mpumalanga — Combined 14.6% of users with growth potential; targeted pricing or content bundles could unlock scale.

Data Quality

7. Clean up profile data — 920 records have Age = 0, 13.1% lack gender, 13.1% lack province, and 4.1% have blank race fields. Implement mandatory profile completion or incentive-based surveys to improve data accuracy and targeting capability.

8. Deduplicate channel names — 'SawSee' vs 'Sawsee' and 'Supersport Live Events' vs 'SuperSport Live Events' appear as separate entries. Standardize naming to ensure accurate reporting.
